Technical Experience

Strong: Javascript, PHP, NodeJS, Express, MySQL, AWS S3/EC2, Github, Git, jQuery, Ajax/Axios, Es6, OOP, HTML5/CSS3, Chrome Dev Tools, Postman, Agile/Scrum, Google APIs, Slack

Experienced: React/JSX, REST, Jest, Unit Testing, Heroku, Bootstrap, MVC, Apache2, Gimp, Composer/NPM, Confluence/Jira

Applications Developed

PartPig (Github | Live Site)   Tech used: React/JSX, Php, MySQL, AWS S3/EC2, Axios, Sendgrid, Javascript, Css3

-Ecommerce platform for used auto parts with a focus on the balance between functionality and UI/UX

- Served as lead back-end developer to design and implement a system to serve up user part data
- Utilized Amazon S3 to store and retrieve user uploaded images.
- MySQL schema and query design, EC2 deployment
- Transactional Email system using Sendgrid
- Custom user login and simple validation

JobMap (Github | Live Site)   Tech used: Javascript, Google Maps Apis, jQuery, AJAX, Html5, Css Grid

-lets you search and view job information visually first, uncluttering your job hunt.

- Visually displaying job search data using Google Maps and Google Places Apis
- Implemented **Javascript** promise chain to handle simultaneous REST Api calls
- Css Grid for modern, dynamic, layout.

Nature Connect (Github | Live Site)   Tech used: Javascript, jQuery, jQuery-UI, Html5, Css3

-a take on the classic connect 4 game, focusing on single player mode and mobile responsiveness

- Designed and implemented single player AI
- jQuery dom manipulation, and Jquery-UI for realistic token drop.
- UI/UX first design for clear, minimalist approach.

Education

CSU Fullerton
- Bachelors in Philosophy: focus in logic

LearningFuze
- Accelerated learning for web development
